

Extract from All Saints Church, Kempston, PCC minutes 23rd April 2024

Fabric. – Weathervane and Tower Roof Faculty Application

Weathervane and Tower Roof;-

The wooden Weathervane Post which is set into the Tower Roof, is unstable and is splitting, and as a consequence allowing rainwater to enter the Belfry through the Tower Roof. The PCC wish to remove the Weathervane Post, to then seal the roof using lead to prevent the ingress of rainwater, and to then replace the Weathervane and Post with a surface mounted construction.

Proposal set before the PCC;-

That the PCC agree to take forward the necessary Faculty procedure in relation to the removal of the current Weathervane Post, to repair the Tower Roof with lead, and to replace the Weathervane and Post with a new Post construction that is Surface Mounted, in All Saints Church Kempston. Laurane Bubbins, the Church Architect, is to Project Manage the works.
